Our evidence collection products are used to aid in the collection of evidence at a crime scene or in the crime lab. Our vast array of products range from evidence tape and bags, to advanced crime scene investigation kits.

### **EVIDENCE CONTAINERS/STORAGE - BAGS**

### **Evidence Security Bags**

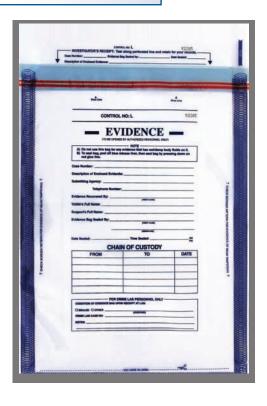

Our series of security bags shown on the following pages have unique, self-sealing adhesive strips that form an instantaneous and permanent seal, making it impossible to reopen the bags without destroying them.

### ATURES

- Self-sealing
- Tamper-evident
- · Leakproof (they'll even hold water)
- · Strong 4 mil. thick, tear and puncture resistant
- · White write-on area with chain of custody
- Transparent for viewing bag contents
- Tear-off receipt for investigating officer
- Preprinted control numbers on bag and investigating officer's receipt

### **Simple Two-Step Sealing Process:**

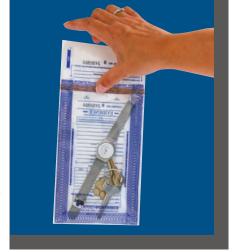

STEP 1

Pull away blue release liner.

### STEP 2

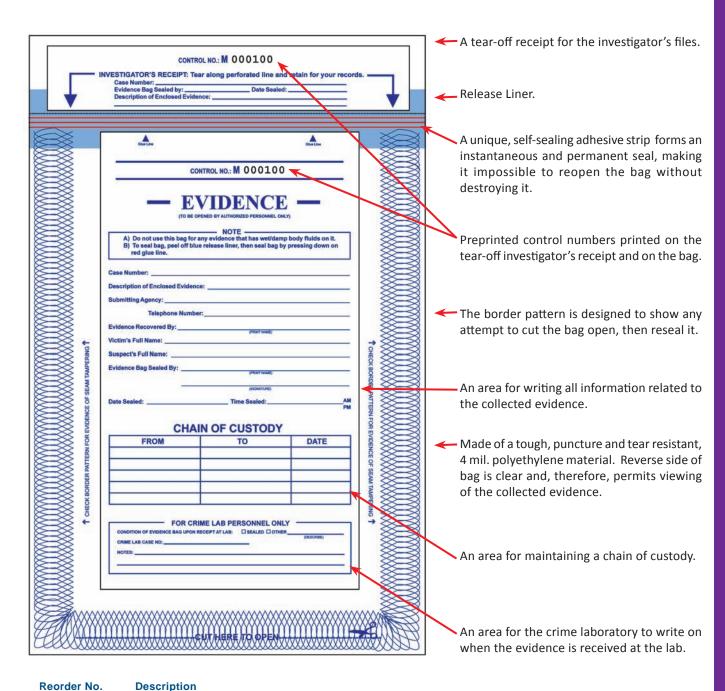

Run your thumb along the red glue line to seal.

Other evidence security bags can't hold water (or even a white, powdery, unknown substance) compared to ours! We're so sure our evidence security bags are the best on the market that we'll send you a sample so you can compare it to the bags your department is now using.

Our series of security bags have unique, self-sealing adhesive strips that form an instantaneous and permanent seal, making it impossible to reopen the bags without destroying them.

### **Evidence Security Bags - Breathable**

SSPA

Our tamper-evident, self-sealing Breathable Evidence Security Bags have all the features of our standard line of self-sealing polyethylene Evidence Bags; however, they allow you to secure damp evidence without the fear of degradation of the collected evidence due to bacterial growth. Our Breathable Evidence Security Bags can be used for securing damp evidence such as marijuana, documents, and currency.

Our bags are made with a 4 mil. thick, tear and puncture resistant front panel and a one-way breathable material that allows damp evidence to continue to air-dry even after it has been sealed in the evidence bag. They are transparent for easy content viewing, have a tear-off receipt, are preprinted with control numbers on the bag and receipt, and have a white, write-on area for chain of custody information. They are provided with unique, self-sealing adhesive strips that form an instantaneous and permanent seal, making it impossible to reopen the bags without destroying them.

Back of bag

### **EATURES**

- Self-sealing
- Tamper-evident
- Strong 4 mil. thick, tear and puncture resistant front panel and 1 mil. thick perforated, breathable, tamper-evident back panel
- Transparent for viewing bag contents
- Tear-off receipt for investigating officer
- Preprinted control numbers on bag and investigating officer's receipt
- White write-on area with chain of custody

EB-M(FPB) Found Property Security Bags - 100/pkg, 9" x 12"

### **Currency/Coin Security Bags**

Our Currency/Coin Security Bags are designed for the security of seized currency, checks, and coins. Like our other bags, once it's sealed, it's permanently sealed.

Reorder No. Description

EB-M(CSB) Currency/Coin Security Bags - 100/pkg, 9" x 12"

### **General Purpose Security Bags**

Our self-sealing General Purpose Security Bags are provided without a write-on area. This allows you to insert your own printed forms in the bag, along with any evidence and/or property.

Reorder No.	Description	
EB-M(NP)	General Purpose Security Bags - 100/pkg, 9" x 12"	

### Paper Evidence Bags - Small, Medium, Large, Tall

Our Paper Evidence Bags are preprinted and include all the information required for proper evidence submission to the crime laboratory, including a chain of custody section.

These evidence bags are made from a heavy-duty kraft paper stock, which is "breathable" and makes them ideal for a wide variety of evidence - from clothing containing body fluids to damp marijuana.

Unlike other paper evidence bags, our bags are clearly marked EVIDENCE in bold letters. The write-on area is printed lower on the bag which allows for a double fold at the top of the bag to prevent loss of trace evidence.

Reorder No.		Description

### Nylon Arson Evidence Bags

Nylon has long been the preferred material for collection and storage of evidence which may contain solvents found in accelerants. Unlike "plastic" bags, solvents will not break down the nylon material of our Nylon Arson Evidence Bags, preventing the loss of flammables and hydrocarbons.

These bags can be closed in the field using cable ties or permanently sealed back in the laboratory using a heat sealer.

The clear material allows the evidence to be seen without opening the bag and can be easily marked using standard marking pens. For long term "stackable" storage, our bags can be placed in metal evidence containers or cardboard boxes.

Reorder No.	Description
BAGNYL18X36	Nylon Arson Evidence Bags - 20/pkg, 18" x 36"
BAGNYL12X18	Nylon Arson Evidence Bags - 20/pkg, 12" x 18"

### Plastic Evidence Bags - Plain

These heavy-duty evidence bags are made of 4 mil. polyethylene material and are excellent for securing all types of evidence.

A large selection of bag sizes is available, and the bags may be heat-sealed or sealed with evidence security tape.

### **Specimen Shipping Box - Insulated**

Our 13.75" L x 10.5" W x 13.5" H (OD) reusable Insulated Specimen Shipping Box is constructed of 275 lb. test fiberboard with 1.5" thick styrofoam interior. When the box is used in conjunction with refrigerant gel packs or dry ice, specimens will remain refrigerated or frozen for several days.

The Specimen Shipping Box is provided with two refrigerant gel pack labels affixed to the outside of the box and two "cover-up" dry ice labels which are affixed over the gel pack labels when dry ice is used to keep the specimen frozen while in transit to the laboratory.

Our boxes comply with overnight carrier regulations for shipping refrigerated or frozen biological specimens.

Reorder No.		Description
COOLERSTY(T/B)	0	Specimen Shipping Box - Insulated

### **Weapon Collection and Storage Boxes**

Our heavy-duty Weapons Collection and Storage Boxes are specifically designed to hold rifles, handguns, or knives. These cardboard boxes feature tuck-in sides and front flaps for extra strength and security, and each box is printed with an area for recording information and chain of custody.

Each box has a series of small holes punched in the bottom so that the weapon can be secured within the box using nylon cable ties. Our boxes are an excellent, nonthreatening way to display evidence in court.

Ties not included. Please see below for releasable and permanently self-locking nylon cable ties.

Reorder No.		Description
BOXG12.5X7.5X2 BOXK16X3X2 BOXR51X9X3	0	Handgun Boxes - 25/case, 12.5" x 7.5" x 2" Knife Boxes - 25/case, 16" x 3" x 2" Rifle Boxes - 25/case, 51" x 9" x 3"

### **Ties - Nylon Cable**

Our 11-inch Nylon Cable Ties are available in either removable or permanently locking versions and will not scratch or damage evidence.

Releasable Ties will allow a crime lab to remove weapons from the

Weapons Collection and Storage Boxes in which evidence has been secured, then resecure the weapons back into the box using the same cable ties.

Permanently Locking Ties feature a pull-tight locking closure and will not release, making them ideal for securing evidence tags to evidence.

Reorder No.	Description
TIES-11N	Permanent Nylon Cable Ties - 100/pkg
TIES-11NR	Releasable Nylon Cable Ties - 100/pkg

### **EVIDENCE CONTAINERS/STORAGE** - CANS, JARS, & TUBES

### **Metal Evidence Containers**

Our Metal Evidence Containers are ideal for packing and protecting small, fragile evidence. These containers come with a white paper write-on label on the lid for marking. They are excellent for bullets, shell casings, paint chips, glass shards, etc. and are easily sealed with evidence security tape or seals.

Reorder No.	Description
CAN.5OZ	Metal Evidence Containers - 25/case, 0.5 oz.
CAN1OZ	Metal Evidence Containers - 25/case, 1.0 oz.
CAN2OZ	Metal Evidence Containers - 25/case, 2.0 oz.

### **Metal Evidence Containers - Uncoated**

These Solid Sample Metal Evidence Containers are a standard method of preserving "solid" forms of physical evidence. Once the lid is put in place, an airtight seal is formed which prevents flammables and hydrocarbons from evaporating into the atmosphere.

Quantity: All sold 10/case except 2 gallon size, which is 4/case.

Reorder	No	Description
Redidei	140.	Description

Seal packages containing evidence with bright red, pressure-sensitive, tamper-evident tape. Bold repeating message printed in black identifies cartons and boxes as evidence.

This is an economical way to safeguard and label evidence in transit or in storage. This durable, 2" W x 165' L, 2 mil. tape features a strong adhesive that securely adheres to all cardboard cartons and boxes.

Reorder No.	Description
TAPEEVR	Evidence Carton/Box Sealing Tape
TAPEDISP	Handheld Tape Dispenser

### Tags - Large and Small Plastic Evidence

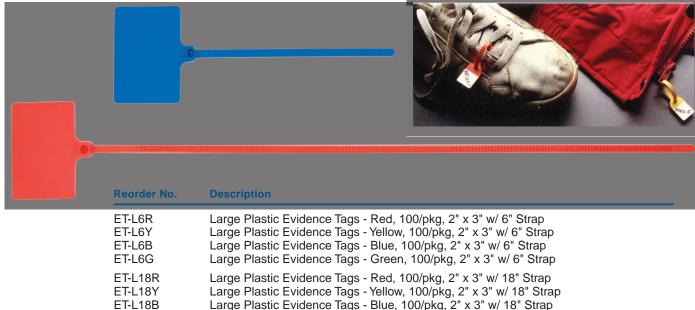

ET-L18G

Our 2" x 3" self-locking Large Plastic Evidence Tags and 1" x .625" self-locking Small Plastic Evidence Tags are made of a tough copolymer nylon material which will not scratch or damage evidence and are perfect for hard-to-tag items.

Our large tags are available in 6" or 18" strap lengths, in four colors, and can easily be written on using a permanent marking pen.

Our small tags are available in four colors and have a 6" strap length and a white write-on area.

Large Plastic Evidence Tags - Green, 100/pkg, 2" x 3" w/ 18" Strap

Reorder No.	Description

ET-S6G	Small Plastic Evidence Tags - Green, 100/pkg, 1" x 0.6" w/ 6" Strap

### **SWABS, SWAB BOXES & SWAB DRYING RACKS**

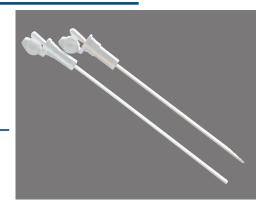

### Swabs - Cap-Shure™ Sterile

Cap-Shure<sup>™</sup> Sterile Swabs are sterilized and individually wrapped with a reclosable, ventilated cap to protect the sample while allowing it to air-dry.

Each swab is cotton-tipped with either a plastic or wood shaft.

Reorder No.	Description
SWAB-CAP-P	Cap-Shure™ Sterile Swab - 50/pkg, Plastic Shaft
SWAB-CAP-W	Cap-Shure™ Sterile Swab - 50/pkg, Wood Shaft

### Cotton-Tipped Applicators

These cotton-tipped, wooden-shafted swabs are the same swabs used in all our Forensic Kits and are used for collecting both wet and dry body fluids from various surfaces. When collecting dry body fluids, the swab's cotton-tip bulb should be lightly moistened with distilled water to lift the dried material from the surface from which it is found.

Quantity: 2/pack, 100 packs/case

Reorder No.	Description
SWAB-COT6W2	Cotton-Tipped Applicators - 100/pkg, 6"
SWAB-COT3W2	Cotton-Tipped Applicators - 100/pkg, 3"

### Swab Protectors

Our swab protectors allow you to package and protect swabs from cross-contamination even if time does not permit air drying the swab at the time of collection. Simply slide the protector up the swab shaft until the swab bulb is covered and protected.

Protectors can be used with both 6" and 3" swabs.

### **Swab Evidence Labels**

Available from:

Our Swab Evidence Labels are an easy way to mark collected swabs with case number, date collected, and collected by information.

Simply remove a label from the sheet of 30 labels and affix to the swab shaft or to the paper sleeve in which the swabs were re-packaged.

Reorder No. Description SE-634

Swab Evidence Labels - 150 labels/pkg

68

### **Swab Boxes**

Our 20 pt. thick chipboard swab boxes are primarily used for the collection of DNA Evidence such as blood and other body fluids. These swab boxes come with .25" breathing holes which allow the swabs to continue air drying even after packaging.

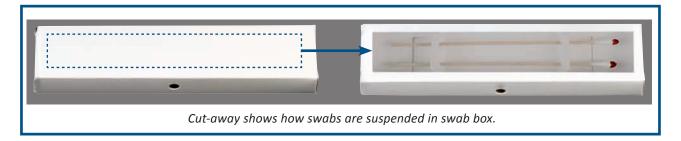

Our Standard Swab Box, which is used in our Sexual Assault Evidence Collection Kit, will hold up to two 6" long swabs.

Our Small Swab Boxes are designed to hold up to two 3" long swabs. The advantage of a 3" swab is less flexibility of the swab shaft when collecting DNA samples.

Our Suspended Swab Box is 7" long and is designed to hold cotton swab bulbs away from the swab box to prevent liquids from being absorbed into the chipboard box if the swabs are still damp or wet when packaged.

Reorder No.		Description	
SWABBOXNPWH6 SWABBOXNPWH3 SWABBOXSUS	(A) (B) (C)	Standard Swab Boxes - 100/pkg, 6" x .5" x .5" Small Swab Boxes - 100/pkg, 3" x .5" x .5" Suspended Swab Boxes - 100/pkg, 7" x 1.5" x .875"	

### Portable Swab Carrying Case, Swab Rack, and Padlock

This 8" L x 8" W x 8.75" H, lockable carrying case is designed for carrying damp swabs from the crime scene back to the laboratory for air-drying. The case is equipped with a swab rack that will hold up to 20 swabs.

Both the carrying case and the rack are made of a plastic material allowing for cleaning with a 10% chlorine bleach solution to prevent the possibility of cross contamination.

Case and rack sold as one unit. Also available are an additional rack and a lock for security.

Reorder No.	Description
SWCC-R	Portable Swab Carrying Case with Rack
SW-RACK	Swab Rack only
PADLOCK-S	Small Padlock with two sets of keys

### Small Swab Drying Cabinet, Swab Rack, and Padlock

Whenever swabs are used for collecting biological evidence bloodstains found at crime scenes, it is always necessary to airdry the swabs before packaging them to prevent degradation of DNA from bacteria. This swab drying cabinet is designed to greatly reduce the drying time by blowing ambient air over the swab bulbs and, at the same time, lessening the possibility of contamination of the collected swabs during the drying procedure.

This lockable drying cabinet measures 13.5" L x 8" W

x 8.5" H and can be used in an examination room when

collecting specimens from body orifices of victims of sexual assault. These lightweight (under 5 lbs.) cabinets can be mounted on a wall if space is limited.

The cabinet is made of a plastic material which is easily cleaned with a 10% chlorine bleach solution to prevent the possibility of cross-contamination.

Case and rack sold as one unit. Also available are an additional rack and a lock for security.

### **EVIDENCE TAPE, TAGS, LABELS, & SEALS**

### Sawtooth® Evidence Security Tape

Our Sawtooth® Evidence Security Tape is the most sensitive, tamperindicating acetate tape available. If physical removal is attempted, the sawtooth edges will tear, while chemical tampering causes the solventsensitive dye to dissolve and smear. The permanent adhesive and instantaneous cure time make our tape excellent for sealing all types of

evidence containers.

Our tape is versatile enough to be used on almost any container, as the examples to the left demonstrate. The envelope to the right proves just how tamper-evident our Sawtooth® Evidence Security Tape really is!

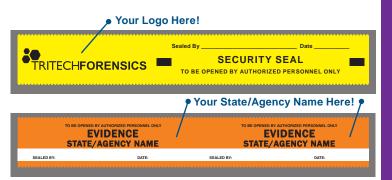

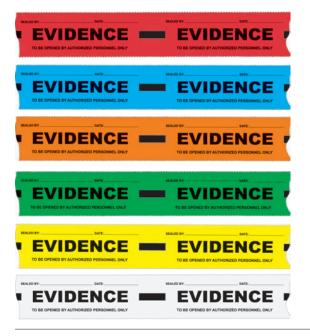

### **No-Hassle Tape Dispenser**

Our Sawtooth® Evidence Security Tape is provided in a preassembled, ready-to-use dispenser. No struggling to separate the tape from the tape backing. The end of the tape "pops up" out of the box and away from the liner each time you use it.

### **Custom Tape and Seals**

If your agency requires a special tape or seal, TRITECH**FORENSICS** is able to design and manufacture a product that will meet your needs. From adding your name and/or logo to one of our current designs to creating new tapes or seals, we have years of experience in creating the best option for your needs. For more information on our custom tape and seals, contact our Custom Products Division at 800.438.7884.

### **Evidence Tape - Sawtooth®**

Our Sawtooth® Evidence Tape is a generous 1.25" wide and comes on a 108' roll in a dispenser box. Available in Red, Blue, Orange, Green, Yellow, and Clear.

### Reorder No. Description

### **Barcodes and Sequentially-Numbered Items**

You've seen them on products in retail stores for years. Used for tracking merchandise and providing merchants with inventory information, barcodes and sequentially-numbered items have now moved beyond simple retail use. Agencies around the world are tracking evidence with bar code labels, and TRITECH**FORENSICS** has the ability to print Custom Bar Coded and/or Sequentially-Numbered Products and Labels for our customers in quantities as small as 500 labels per roll. Our Bar Code Labels can be printed with your agency's name and any identifying mark you require and in any code your scanners read.

Labels are available in sizes from .25" W x .25" H up to 7" W x 7" H and can be supplied in side-by-side duplicate labels on the same roll.

Please contact our Custom Product Division for more details and pricing at 800.438.6600. Pricing will vary based on quantity, size, and style.

### CRIME SCENE DOCUMENTATION

### **Crime Scene Evidence Marking Cones - Versa-Cones**

What makes Versa-Cones so great? It's one of those ideas everyone wishes they had thought of: numbers on all four sides. This allows you to take photos from any vantage point without spending extra time moving cones.

Available in four colors, these sturdy cones are designed not to tip over or blow away, giving you the security of knowing you will be able to locate all of your evidence when the time comes. In extreme conditions, the pre-drilled holes on top of the cones allow for flags or stakes to be inserted for an additional safeguard.

CLIPBD8.5X14	Redi Write-On Clipboard - 8.5" x 14"

### **Reflective Evidence Marking Chalk**

ITECHFORENSICS

This highly reflective chalk is used for marking the location of evidence found at a crime scene. The reflective chalk can be used on hard surfaces such as roads,

driveways, sidewalks, etc., and can be illuminated by car headlights, flashlight, or even photoflash.

Evidence can be circled, numbered, or marked with north arrows to orient outdoor crime scenes.

Three marking chalks which measure 1" in diameter by 4" long are supplied in each box.

### **Crime Scene Sketch Templates**

While photographs are useful, scale drawings of a crime scene can provide far more precise information pertaining to distances from objects in a room to the evidence and provide a jury with a bird's eye view of the crime scene. Our plastic templates aid in these drawings by giving investigators correct proportion and uniformity in sketches.

### **Crime Scene Template**

This .25" = 1' scale template measures 8.5" x 11" and is the most complete template available for crime scene investigators.

### **Human Figure Template**

This 8.5" x 11" scale template is useful for both homicide and traffic accident investigators. The template has a scale of .25"=1' and allows you to sketch both males and females in virtually any position.

### Traffic Accident Investigator's Template

This 4.5" x 10" plastic template ensures proper proportion and uniformity in descriptions and integration of accident scenes.

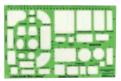

### **Large Vehicle Template Set**

This 3-piece template set is 4" x 8" and is provided in a leatherette case. Subjects are Municipal Vehicles, Farm/ Recreational Vehicles, and Construction Vehicles. The scale is 1" = 20 feet.

TMP-RR	Railroad Traffic Template
TMP-LV	Large Vehicle Template Set - 3 piece
TMP-DT	Double Traffic Template Set - 2 piece
TMP-T5	Traffic Investigation Template Set - 5 piece

### **House Furnishing Template**

This 5.5" x 8.625", .25"= 1' scale, plastic template is used for showing the locations of furniture and appliances in houses or apartments where burglaries, robberies, or homicides have occurred.

### **Office Plan Template**

This .25"=1' scale template is 8.125" x 8" and contains the most often used office furniture.

### **Railroad Traffic Template**

This 8.5" x 11" template contains cutouts for various sized cars, engines, signals, and railroad ties. It contains a scale ruler, a protractor, and a compass.

### **Double Traffic Template Set**

These  $4" \times 8"$  plastic templates come in a leatherette carry envelope. The templates include a speed nomograph and have 1"=20' and 1"=10' scales.

### **Traffic Investigation Template Set**

This set of five templates measures 1.25" x 7" and comes in a black leatherette case. It includes an accurate speed nomograph, protractor, compass, and a scale ruler.

### Crime Scene Sketch Kit - Advanced

This Advanced Sketch Kit contains all necessary components (including all templates shown here), for a rough sketch, a finished sketch, and a finished scale drawing or any type of sketch required for your report and for presentation in court.

### **Measuring Wheels - Small**

Our lightweight (2 lbs.), 4" Small Measuring Wheels are usually used for measuring distances inside buildings or on even surfaces such as paved road, parking lots, or sidewalks.

They are available in one and two wheel versions and in either feet/inches and meter/decimeter models.

All four models come with distance meters and push-button resets, as well as telescoping handles (17.25" long collapsed, 38.5" long when extended).

Reorder No.	Description
MW-1F MW-1M MW-2F MW-2M	Small Measuring Wheels - 4", 1 wheel, English (feet/inches) Small Measuring Wheels - 4", 1 wheel, Metric (meters) Small Measuring Wheels - 4", 2 wheels, English (feet/inches) Small Measuring Wheels - 4", 2 wheels, Metric (meters)

### **Measuring Wheels - Medium**

Our 5 lbs., 11.25" Medium Measuring Wheels are useful when measuring distances over rough terrain such as open fields or through wooded areas. The large wheels allow you to quickly cover long distances up to 10,000 feet (10,000 meters).

These Measuring Wheels are available in both feet/inches and meter/decimeter models. All models come with distance meters and push-button resets as well as a collapsible handle (40" extended, 22.25" collapsed) for easy storage when not in use. A stand is provided with each Medium Measuring Wheel.

Reorder No.	Description
MW-3F	Medium Measuring Wheel - 11.25", English (feet/inches)
MW-3M	Medium Measuring Wheel - 11.25", Metric (meters)

### **Measuring Wheel - Large**

Our 6 lbs., 19" Large Measuring Wheels are useful when measuring distances over rough terrain such as open fields or through wooded areas.

The large wheels allow you to quickly cover long distances up to 10,000 feet.

All of our measuring wheels come with distance meters and push-button resets as well as a collapsible handles (43.875" extended, 26.125" collapsed) for easy storage when not in use.

Reorder No.	Description
MW-5F	Large Measuring Wheel - 19", English (feet/inches)

### **Measuring Tapes**

Our series of measuring tapes offer several advantages to an investigator. Their ergonomically designed plastic housing includes rubber grips for comfort. The 1" wide metal tape is nylon coated for longer life and provides a flat finish, eliminating glare in photographs.

Reorder No.	Description	
MT-25F	Measuring Tape - English (feet/inches), 25 ft.	
MT-26F/8M	Measuring Tape - English & Metric, 26 ft./8 M.	
MT-8M	Measuring Tape - Metric (meters), 8M.	

### **Electronic Distance Measuring Devices**

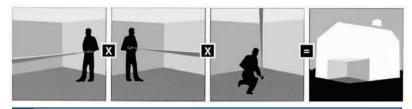

Our handheld Electronic Distance Measuring Devices use ultrasound technology to accurately measure distances (99.5%  $\pm$  .25" (1 cm.)) at both indoor and outdoor crime scenes.

Both of these devices work by sending out narrow beams of sound waves that bounce off solid "targets" and return to the handheld receivers. The receivers contain sophisticated electronics and microprocessors that convert elapsed time into a distance measurement which is shown in the easy-to-read LED display window. Both devices have a built-in calculator to add linear measurements and compute areas and volumes. Easy to understand instruction sheets are also included.

Reorder number EDMD (black) is equipped with a laser pointer to show you where you are aiming; however, it can only be used when the "target" is a flat surface, such as a wall or window. If the target is not flat, such as a tree trunk, light pole, etc., the sound waves may not return to the receiver.

Reorder number EDMDT (yellow) eliminates the requirement that the "target" be flat. This unit is supplied with an electronic "target" which can be mounted on a camera tripod or taped to or held on a curved or round surface, guaranteeing the receiver will be able to measure the distance.

### Reorder Number EDMD Black:

- High visibility aiming laser
- Measures from 1'6" up to 60' (18 m.)

### **Reorder Number EDMDT Yellow:**

- Electronic target has a LED which confirms signal from receiver
- Target has screw fitting on bottom to allow attachment to a tripod
- Measures from 1'6" up to 250' (75 m.)

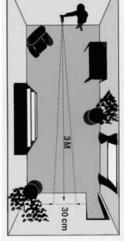

### **Common Features:**

**EATURES** 

- Computes areas and volumes
- Adds linear measurements, area, and volumes
- Measures in ft./in., m./cm., decimal ft., and yds.
- Tracking and validate modes
- 7 memory with easy recall
- Automatic internal temperature compensation
- Auto shutoff 7 minutes after last use
- Multilingual Quick Reference instruction label
- Low battery warning
- Powered by two 9 volt batteries (not included)
- Accuracy of 99.5% ± .25" (1 cm.)
- Protective pouch with belt loop
- 1-Year warranty

PSP-WB	White Scales - Black Printing, 10/pkg
PSP-YR	Yellow Scales - Black Printing 10/pkg

### Photomacrographic Scale - Authorized ABFO No. 2<sup>®</sup>

The ABFO No. 2<sup>®</sup> Scale was designed by the American Board of Forensic Odontology and is used through the country when photographing bite marks on a victim's body. The three crosshair circles are useful in helping to compensate for distortion resulting from oblique camera angles. The graduations are all metric, except for the width of the legs, which are 1" wide.

Rigid, L-shaped piece of laminated plastic 1 mm. thick

- Millimeter markings accurate to 0.1 mm. or better
- Overall size is 105 mm. x 105 mm. (about 4" x 4")
- Gray areas have a reflectance value of approximately 18%
- Alternating black and white bars (1 cm.) to permit measurements from grossly over- and underexposed photographs.

Reorder No. Description **Price Per PSP-ABFO** Authorized ABFO No. 2 Photomacrographic Scale

### Photomacrographic Scale - L-Shaped

This L-shaped scale is similar to the ABFO No. 2<sup>©</sup> Scale; however, it is printed in inches rather than the metric system.

It is made of the same heavy, laminated plastic with a nonglare finish and has 3 crosshair circles to assist in correcting parallax. There are alternating black and white bars to allow for measurements of grossly over or underexposed photographs and bars of approximate 18% gray scale for color corrections.

### Photomacrographic Scale - L-Shaped Fluorescent This scale is identical to the L-shaped Photomacrographic Scale, but it is constructed of heavy cardstock.

These Fluorescent Photomacrographic Scales are printed in a bright orange which fluoresces under a UV light source.

This scale is used when photographing evidence such as latent prints that have been dusted with fluorescent powders.

### **Photo Scales - Disposable**

Printed on heavy, white cardstock, TTF's 6" Disposable Evidence scales are inexpensive and include both inch and centimeter measurements. Information about the crime scene, photo, or location can be noted on the scales to provide extra information in the photographs.

These Disposable Evidence Scales are ideal for use at crime scenes or anywhere cross-contamination is an issue.

Reorder No.	Description
PSC-WB	Photo Scales - Disposable - 25/pkg

### The "Bureau" the long arm

### **Bureau Reference Scale**

The "Bureau" Reference Scale 2-piece set contains an L-shaped scale which is 30 cm. long on the long arm and 15 cm. on the short arm, and a second straight scale which is 15 cm. long.

One side of each scale is white with black print, and the other side is black with white print. These scales are made to official FBI specifications and photograph well under a variety of lighting conditions. These scales have crosshair circles which provides a means of checking and correcting perspective distortion.

Reorder No.	Description	

PSP-BUR Bureau Reference Scale

### **Photo Scales - Adhesive Backed**

These 2" (50 mm. long) scales are available in 3 different, nonglare colors and are primarily used on vertical surfaces such as walls, cabinets, car fenders, windows, etc., for photographing bullet holes, blood spatter, fingerprints, etc.

#### Shoe/Boot Photo Stands

This Shoe/Boot Photo Stand was developed to hold footwear in an upright position to assist crime laboratory personnel in the photographing and examination of footwear collected from a suspect. The stand can also be used for comparing the collected footwear to castings or lifted dust prints from a crime scene.

This stand is made of .75" wood covered with a matte finish black laminate and measures 18" L x 12" W x 14" H and weighs 16.6 lbs.

The two white sliding panels lock the footwear in place, and the matte finish, pre-printed Photo Information Cards can be easily attached to the panels via the spring-loaded card clamps. These cards allow

NOTE: Available with either inches or metric scales.

you to record all pertinent information pertaining to the photograph using a fast-drying, felt-tipped pen.

Fifty Photo Information Cards and a felt-tipped pen are supplied with the stand.

Although the stand was developed for footwear, it can be used for photographing a variety of other types of evidence as well.

# **NEW ITEM**

# **Crime Scene Stepping Plates**

Crime Scene integrity is one of the toughest challenges that investigators face. Often trace evidence is introduced or damaged in the investigation process by simply walking through the crime scene. Our transparent, durable Crime Scene Stepping Plates provide crime scene investigators an invaluable new tool.

By placing the clear stepping plates on the floor investigators can enter the crime scene and navigate through while never touching or disturbing possible trace evidence in the walkway. The transparent design gives investigators a clear view of what's under each step they take. Additionally, the interchangeable one-time use Rubber Pads can be applied to the feet of the plates and will pick up any trace evidence with which they may come into contact. We recommend the plates always be used in conjunction with our rubber pad kits (small rubber pads which are applied to the feet of each stepping plate that can later be bagged and tagged for evidence or disposed of after each use).

#### **Benefits**

- Transparency, lightweight, and stackable
- · Easy to clean
- Microscene protector
- Maximize the opportunity to preserve and collect evidence
- Demonstrate professional standards in the prevention of cross-contamination
- Protect the scene, protect your people

# **The Coverup Evidence Protector**

Coverups were developed to protect a wide variety of evidence at crime scenes, including pistols, knives, shell casings, etc., from being rained on, snowed on, stepped on, moved, or picked up by unauthorized personnel.

Unlike styrofoam coffee cups or other lightweight items, Coverups are made of a clear plastic material, allowing you to see the evidence without having to remove the Coverup protecting it.

Coverups won't blow away in the wind because they come with 4 adhesive strips that will stick to almost any dry surface, from sidewalks to carpets, 4 barbed tabs that lock onto grass, and 4 holes which allow you to secure Coverups on dirt, sand, mud, or snow by using 4" to 6" nails.

Reord	ler N	lo.

# **BLOODSTAIN IDENTIFICATION**

# **Hemident™ Presumptive Blood ID Kit**

Used for the presumptive identification of bloodstains, Hemident™ is nondestructive and enables the investigator to retain the evidence intact for further laboratory analysis. Each test is a compact, self-contained unit, consisting of two ampoules of prescribed reagents within a disposable plastic tube.

To use Hemident<sup>™</sup>, simply swab the suspected blood stain/drop with a cotton-tipped swab (swab bulb may be moistened with water if suspected blood is dry), then break off wooden swab shaft and place swab bulb in the tube. Break the two ampoules which contain the reagent. If the stain/drop is blood, the swab and solution will turn blue-green in a few seconds. The reagents are capable of identifying down to one part per million of blood.

Hemident™ was designed for field test use and, as such, will not distinguish between human and animal blood. Laboratory analysis is necessary to determine the source of the blood.

Reorder No.	Description	
ODV-7812	Hemident™ Presumptive Blood ID Kit - 10/box*	

# **HEXAGON OBTI Presumptive Blood ID Kits**

Unlike other presumptive field bloodstain test kits, Hexagon OBTI distinguishes HUMAN blood from ANIMAL blood, and therefore eliminates the time involved in collecting non-relevant bloodstains and waiting weeks for laboratory results.

The testing of suspected human bloodstains at the crime scene using Hexagon OBTI is simple, straightforward, and takes 2 to 3 minutes.

A sample of the questioned blood is transferred to the Hexagon OBTI reagent bottle, then two drops of the reagent are placed onto the test cassette. If the sample is human blood, two blue bars will appear in the test result window of the test cassette.

Reorder No.	Description

# **Luminol Blood Detection Reagent Spray**

Luminol is a reagent specifically formulated for the detection of blood at a crime scene, even if the blood is invisible to the human eye or if someone has attempted to wash the area.

When luminol is sprayed on a suspected area, it will glow a white/blue when it comes in contact with blood in a darkened room (UV lamp not required). The resulting pattern can then be photographed.

Our Luminol Blood Detection Reagent Spray is available in 4, 8, and 16 oz. bottles. A pair of nitrile barrier gloves and a vial of activation fluid is included with each bottle.

# Bluestar® Latent Bloodstain Reagent

Since its introduction in Europe in early 2001, Bluestar® Forensic has become the latent bloodstain reagent of choice for crime scene investigators.

Bluestar® is the most sensitive latent bloodstain reagent on the market. Invisible bloodstains produce an intense blue chemiluminescence (420 to 440 nanometer range) immediately after being sprayed with Bluestar®. Compared to traditional luminol reagent, Bluestar® is three times brighter, is luminescent longer and is visible to the naked eye in semidarkness.

Once a bloodstain has been located, the area can be sprayed again and again for further observation and photographing. Photographs can be taken with either a digital or a traditional camera, eliminating the need for expensive and sophisticated cameras and light sources.

Unlike other latent bloodstain chemiluminescence sprays, Bluestar® does not adversely affect DNA. After the stain has been located and photographed, samples of the

bloodstain can be collected and submitted to your crime laboratory for DNA typing.

Preparing Bluestar® is simple and straightforward; simply tear open the foil pouch containing the two Bluestar® tablets and drop the tablets into a spray bottle containing 125 ml. of distilled water. Within two to three minutes, the tablets will dissolve, and Bluestar® is ready for use. Best results are obtained when Bluestar® is used within three hours after mixing.

# Bluestar® Training DVD

\* Not Available for International Sale

This 47-minute DVD details how to use Bluestar® at a crime scene from start to finish. Each chapter can be accessed directly without having to view the entire DVD, allowing you to access the chapter of interest.

- Easy to use
- Non-toxic
- Odorless

#### **Reorder Number: BLSM-1**

Magnum Formula Bluestar® is recommended for use on miscellaneous items, surfaces, or clothing that have been washed.

#### **Reorder Number: TRN-BLS-8**

Low cost "Training" Bluestar® is identical to the standard Bluestar®; however, it will destroy DNA and prevent DNA typing of the bloodstain. "Training" Bluestar® is used by schools as a teaching aid, by companies that decontaminate crime scenes, and by agencies not requiring DNA typing of the bloodstain. Each box of "Training" Bluestar® contains eight sets of tablets packaged in two plastic vials.

#### Reorder Number: BOT16HS

Our 16 oz. Pump Spray Bottle has an adjustable spray nozzle which allows you to "mist" Bluestar® on questioned areas. Each box of "Training" Bluestar® contains eight sets of tablets packaged in two plastic vials.

# **EVIDENCE DRYING CABINETS**

# **Evidence Drying Cabinets - Mobile**

In order to maintain the integrity and credibility of your evidence, it is imperative that your drying evidence be protected and contamination free. If you're drying blood stained or wet evidence on examination tables, on the floor, in jail cells, in shower stalls, or in evidence rooms, you run the risk of cross-contamination, loss of trace evidence, and lack of evidence security.

Our Mobile Evidence Drying Cabinets are designed to provide a secure, tamper-evident area for air-drying clothing, bed sheets, blankets, towels, etc., from homicides and sexual assault cases. The evidence drying cabinets are constructed of a sturdy PVC frame and floor pan, covered on all six sides with a unique synthetic mesh fabric that permits air-drying of evidence. The fabric does not absorb liquids, is easily cleaned with household detergents, and can be sprayed with a 10% bleach solution to eliminate blood borne pathogens and DNA cross-contamination.

The cabinets are equipped with plastic hangers, plastic zippers (to secure the access flap), a hanging mesh bag (for shoes, currency, or other small items), and quality locking wheels that allow you to move the cabinets from one location to another.

Self-locking evidence security tags may be purchased separately to provide tamper-evident "locks" to keep evidence secure during the drying processes. The bottom of the Mobile Evidence Drying Cabinet floor pan may be lined with a paper sheet to catch any trace evidence such as hair or fibers that may fall off evidence.

Security Tag

# **Mobile Evidence Drying Cabinets**

Our evidence drying cabinets are used by:

- State and Federal Crime Laboratories
- **Medical Examiners and Coroners**
- Law Enforcement Agencies
- **Hospital Emergency Rooms**
- **Drug Agents**

#### Benefits of using a drying cabinet:

- Isolates and separates unrelated cases
- Eliminates cross contamination
- Reduces defense challenges in court
- Maintains chain of custody
- Cost effective

# **Evidence Drying Cabinets - Stationary**

These Evidence Drying Cabinets are specifically designed to air-dry wet or damp evidence containing biological fluids in a controlled environment.

They ensure evidence integrity and protect laboratory personnel from odors, particulates, and contaminates by means of four built-in filtering systems.

The drying cabinets are ductless and do not require expensive modifications to your lab for outside venting.

#### **Filter System**

- Particulate Pre-Filter at base of access door
- Particulate Pre-Filter in interior of cabinet
- Chemisorptive Carbon Filter eliminates odors
- HEPA Filter protects lab personnel from particulates

#### **Operating Indicators and Alarms**

- A green pilot light indicates all filters are operating effectively
- A red pilot light indicates when the Pre-Filter in the access door needs to be replaced
- A red pilot light and air pressure gauge indicate when the HEPA Filter needs to be replaced
- A red pilot light indicates when the Chemisorptive Carbon Filter needs to be replaced

#### **Washdown Features**

- Built-in water spray hose with electric water pump
- Built-in drain

EATUR

#### **Additional Features**

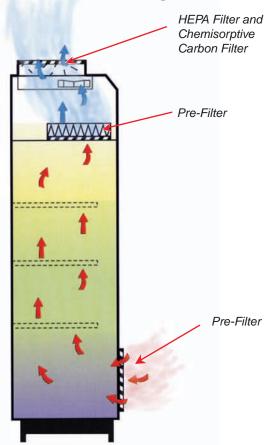

- Easy installation and relocation
- **Ductless** design
- Clear Lexan™ doors can be locked with padlocks or evidence tags
- 3 stainless steel removable shelves
- Fiberglass liner with rounded corners, free of seams and welds, prevents potentially contaminating material from being trapped in corners
- Lightweight and durable epoxy-coated, corrosion-resistant aluminum cabinet
- 2-year warranty

#### **Dimensions**

- EDC-1120: 24" D x 30" W x 84" H weight: 250 lbs. (shipping weight: 350 lbs.)

# **Evidence Drying Cabinets with Casters - Downdraft**

Our series of ductless, Downdraft Forensic Evidence Drying Cabinets perform the same function as units costing more than twice as much—they air-dry wet or damp evidence containing biological fluids and/or trace evidence while protecting laboratory personnel from odors, gases and particulates.

We offer both a 36" wide and 48" wide single door cabinet and a 60" wide double door cabinet. The double door design is similar to the single door cabinet except it is 60" wide, which allows the drying of large items such as bedspreads, blankets etc., and comes with two 200 cfm. centrifugal fans and two sets of filters to accommodate the larger inside dimensions.

Our cabinets are made of a heavy gauge polypropylene material which will not rust and is easily cleaned using household detergent and then sprayed with a 10% bleach solution to eliminate DNA cross-contamination from one case to another. Since our cabinets come with hard rubber casters, they are mobile and, therefore, can be easily moved from one location to another in your laboratory.

Our lockable Evidence Drying Cabinets incorporate a simplified design which will provide you with years of trouble-free service.

Unlike other drying cabinets, air is drawn in from the top of our cabinets where the air is usually cleaner, then exhausted out the lower side of the cabinets. This unique airflow design prolongs the working life of the air intake Technostat pre-filter(s).

To change the three exhaust filters (Technostat, HEPA and carbon mixed bed), simply pull out the filter tray(s) located directly below the clear acrylic door(s), and insert new filters.

See additional units in our Laboratory Equipment Section on pages 252 - 262

# DOWNDRAFT FORENSIC EVIDENCE DRYING CABINETS SSPA

FEDC-1120, FEDC-1120-48, FEDC-2120, FEDC-PREFILT, FEDC-HEPA, & FEDC-CARBON

Features printed in BLACK are common to all three evidence drying cabinets.

Features printed in BLUE are specific to the FEDC-1120-48 extra wide, single door evidence drying cabinet.

Features printed in RED are specific to the FEDC-2120 double door evidence drying cabinet.

#### **Filtering System**

- Technostat Air Intake Pre-filter, located on the front top of the cabinet, traps particles down to 5 microns in size. (Double door version has two Technostat Pre-Filters.)
- Technostat Pre-exhaust Filter, located on the front of the cabinet below the clear acrylic door, traps particles down to 5 microns and, therefore, prolongs the working life of the two remaining filters described below. (Double door version has two separate Technostat Pre-Exhaust Filters.)
- 3" thick, aluminum framed HEPA secondary exhaust filter traps particles down to 0.3 microns in size. (Double door version has two separate HEPA Secondary Exhaust Filters.)
- 4" thick carbon, mixed bed, Final-Filter eliminates odors and gases. (Double door version has two separate carbon, mixed bed, final-filters.)
- Filtering system is effective to 99.997%.
- Unlike most evidence drying cabinets, the air is drawn down from the top front of the cabinet and exhausted through the bottom. Since room air is usually cleaner near the ceiling, this unique approach prolongs the working life of the air intake pre-filter.
- · Complies with OSHA guidelines.
- The Technostat Air Intake Pre-Filter(s), on the top front of the cabinet, should be replaced every three to six months under normal use or when it becomes discolored.
- The Technostat Exhaust Pre-Filter(s), located in the bottom (below clear acrylic door[s]) of the cabinet should be inspected every six months and changed if discolored.
- The HEPA and Carbon Mixed Bed Filter(s), located in the bottom (below clear acrylic door[s]) of the cabinet, have a working life from 24 to 36 months under normal use.
- Filters are easily changed by operator.
- Drying cabinets are supplied with a complete set of filters.

#### **Operating Controls**

- On/Off rocker switch
- Red Warning light indicates filter(s) need to be checked for replacement.

#### **Design and Construction**

- The cabinets are made of a heavy gauge white polypropylene throughout; this facilitates easy cleaning with detergent and a 10% bleach solution.
- Single Door Drying Cabinet Interior dimensions are 35" Wide X 27" Deep X 53" High (28.44 cubic feet).
- Single Door Drying Cabinet Exterior dimensions are 36" Wide X 28" Deep X 73" High.
- Extra Wide Single Door Drying Cabinet Interior dimensions are 47" Wide X 27" Deep X 53" High (38.91 cubic feet).
- Extra Wide Single Door Drying Cabinet Exterior dimensions are 48" Wide X 28" Deep X 73" High.
- Double Door Drying Cabinet Interior dimensions are 59" Wide X 26.5" Deep X 53" High (47.73 cubic feet).
- Double Door Drying Cabinet Exterior dimensions are 60" Wide X 28" Deep X 73" High.
- Four 3" heavy-duty lockable casters allow cabinets to be easily moved from one location to another or stored when not in use (fits through any door).
- Single Door Drying Cabinet weighs 250 lbs.
- Extra Wide Single Door Drying Cabinet weighs 275 lbs.
- Double Door Drying Cabinet weighs 380 lbs.
- Gravity drain located 20" above the floor for proper drainage into a floor drain via a 1.25" ID drainage hose or into the waste water container is supplied.
- Clear acrylic door(s), .375" Thick X 31.125" Wide X 43" High, with two key locking handles insures evidence security during the drying process (two sets of keys supplied).
- Supplied with a polypropylene freestanding tray for shoes or other small evidence requiring drying.
- Single Door Drying Cabinets are supplied with one low noise, 200 cfm. centrifugal fan, which yields more than 150 cabinet air exchanges per hour.
- Double Door Drying Cabinet is supplied with two low noise, 200 cfm. centrifugal fans.
- 1-Year warranty on parts and labor.

# TRACE EVIDENCE COLLECTION

#### Forensic-Swab Trace Evidence Collection Swab

The new Forensic-Swab Trace Evidence Collection Swab is suited for the collection of both reference samples and evidence of DNA traces at crime scenes.

The ventilation membrane in the tube base enables self-drying of the swab within the tube. Drying of the swab outside the tube as in standard systems becomes unnecessary, thereby excluding the risk of mix-up and contamination.

The EtO sterilization method was specially developed to comply with the requirements of forensic analysis, including most stringent purity conditions in the production process, ensuring the absence of DNA collection.

The Forensic-Swab is produced under stringent hygienic purity conditions. The completely assembled swab is individually wrapped, and the final product is subjected to a special EtO sterilization procedure developed for forensic applications.

With a test procedure based on a detection limit of 0.023 ng. DNA/ $\mu$ l. extracted volume, absence of DNA is now guaranteed. A 62 bp. amplicon also enables the detection of partly degraded DNA (target gene: human telomerase reverse transcriptase (5p. 15.33), single-copy gene).

The Forensic-Swab is packaged in a transport tube with a ventilation

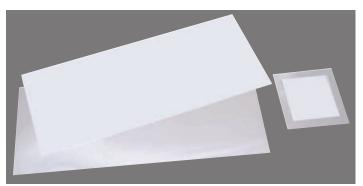

membrane. This ventilation membrane ensures a self-drying process in the tube and also protects the swab from contaminants. A dry swab prevents bacteria and mildew growth, which make analysis impossible and destroy the sample.

Reorder No.	Description	
SWAB-FOR-S	Forensic-Swab Trace Evidence Collection Swab - 25 swabs/pkg	

# **Trace Evidence Collection Backing Cards**

These 6" W x 15" L vinyl backing cards are designed to be used with our Trace Evidence Collection Tape. The use of these backing cards will protect the collected evidence from contamination and/or loss.

Simply cut a piece of the backing card slightly larger than the tape used for collection, then affix the tape to the card. Using a ballpoint pen or a permanent marker, write pertinent information concerning the evidence on the back of the card and submit it to your crime lab for analysis.

Reorder No.	Description

# Trace Metal Detection Spray

Our Trace Metal Detection Spray is a reagent which is sprayed on the suspect's hands and then examined under short wave ultraviolet light for telltale traces of a metal tool or weapon.

This is the same chemical reagent supplied in our Trace Metal Detection Kit.

Reorder No.		Description
LC-TMD-8	Н	Trace Metal Detection Spray - 8 oz.

#### Trace Metal Detection Kits

When an individual handles metal objects or weapons, trace amounts of the metal are deposited on his or her hands. Our Trace Metal Detection Kit is designed to detect those metal traces.

Simply spray the trace metal detection solution on the suspect's hands, then illuminate the area with the short wave UV lamp to make the trace metal visible.

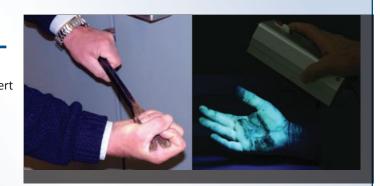

In most cases, the actual shape of the metal object can be determined on the suspect's hands.

# **Trace Evidence Vacuum Collection System**

The importance of trace evidence such as glass shards, fibers, hair, and even plant spores is becoming increasingly more valuable to investigators since an increasing number of crime laboratories are now using Scanning Electron Microscopy (SEM) for trace evidence analysis.

Our compact (17.8" L x 7.75" W x 9.25" H), lightweight (9 lbs., 14 oz.) Trace Evidence Vacuum Collection System is supplied with a 15 ft. power cord and incorporates a filter in the nozzle that traps trace evidence as small as 0.1 micron in size.

Operation of the System is straightforward. Simply remove the filter/nozzle assembly from the heat-sealed plastic bag, attach it to the vacuum hose which extends 5 ft., then vacuum

the suspected area (cushions, couches, car interiors, etc.). After collection, place the filter/nozzle assembly in the self-sealing evidence bag provided and submit it to your crime laboratory for analysis.

Our vacuum system comes with one initial filter and evidence bag and includes a 3-year warranty.

#### Metal Detector - Garrett CSI 250

The all new Garrett CSI 250 Ground Search Metal Detector is simple to operate, yet it features unparalleled performance for budget-minded departments and agencies.

It includes superior technology such as a graphic target ID, sensitivity adjustment, and notch discrimination to accurately identify the type of target

identified. The CSI 250 also includes the 6.5" x 9" PROformance search coil, which covers more ground per sweep and is submersible.

In addition, the advanced metal detector features a Target ID Legend designed to identify targets commonly sought in crime scene investigations.

(ABOVE) The lightweight design of the CSI 250 makes large area searches easier.

(LEFT) The CSI 250's easy-to-read touch pad controls allow you to concentrate on finding evidence instead of spending valuable time making adjustments.

#### Sophisticated, Easy-to-Use Design

- Six Touch Pad Controls
- Microprocessor Controlled
- Large, Easy-to-Read LCD
- Three Level Audio ID Tones
- Adjustable to 42" to 51"
- 3 Piece Disassembly to 24"
- .25" Headphone Jack
- Interchangeable, Waterproof Searchcoil
- Adjustable Arm Cuff with Strap

#### **Smart Controls**

# **INVESTIGATION KITS**

# **Infant/Child Death Investigation Kit**

In collaboration with a leading expert in child death investigations, TRITECHFORENSICS has developed the first-of-its-kind Infant/Child Death Investigation Kit (ICD Investigation Kit). This ICD Investigation Kit was developed to assist law enforcement and medicolegal investigators with the particular demands faced in the collection of information and evidence in child death cases. The ICD Investigation Kit contains customized forms specific to the common types of deaths of infants and minors, as well as the necessary authorization for release of information and demographic forms so that relevant records can be obtained.

TRITECHFORENSICS partnered with an expert in child development and child death investigations who provides training nationally to law enforcement professionals involved with the handling and investigation of child fatalities.

The smallest detail in a child death investigation can mean the

difference in determining the cause and manner of death. The ICD Investigation Kit is the only comprehensive solution to ensure that critical information and evidence is gathered in every case.

# **Forensic Entomology Kit**

In collaboration with internationally renowned forensic entomologist Dr. Jason Byrd, Ph.D.,

TRITECHFORENSICS has designed this innovative kit for the

collection of insects and related arthropods that are associated

with death investigations. Our joint efforts have created the critical instruction manual, customized forms, and unique components that are necessary to assist an investigator in today's world.

Our partnership with Dr. Byrd produced the manual included with this Forensic Entomology Kit, providing specific instructions on the procedures to collect

specimens for evaluation. Based on many years of crime scene investigation experience, the customized forms were written clearly and concisely in order to provide step-by-step directions that investigators will find easy to use. Even investigators with limited experience utilizing forensic entomology kits will find the kit to be straight-forward and designed to walk them through the process with confidence.

#### **Vehicle Paint Evidence Collection Kits**

Our Victim and Suspect Vehicle Paint Evidence Collection Kits are designed for collecting paint samples in hit-and-run cases. Both kits are supplied with detailed instruction sheets and all necessary components to ensure proper collection, preservation and documentation of the collected samples.

These kits are supplied with heavy-duty surgical scalpel blades which are strong enough to allow the investigator to collect all layers of paint down to the vehicle's bare metal or fiberglass without breaking. Three blades are provided in each kit for collecting one "known" and two questioned samples. Both kits also come with a two-ply NCR Paper Vehicle Diagram Form to indicate exactly where the paint samples were collected from the vehicle.

# VP-0GEN(V) & VP-0GEN(S)

- 1 ea. Tamper-evident pre-sealed kit envelope 6" x 9"
- 1 ea. Instruction sheet
- 1 ea. Vehicle Diagram Form printed on two-ply NCR paper
- 1 ea. Known Paint Sample Envelope containing one folded paper bindle
- 2 ea. Questioned Paint Sample Envelope containing one folded paper bindle
- 3 ea. Scalpel Blades
- 4 ea. Police Evidence Seals, for sealing kit and paint sample envelopes after sample collection

Only the Victim's kit is shown above.
