SSPA - RESTRAINTS

FACTORY
DIRECT

SSPA can offer you standard and OVERSIZE restraints

Hiatts, Peerless, AHC and many more brands are manufactured exclusively by the International Handcuff Factory. One of the last remaining foundry's.

Exclude the advertising labels and packaging, the bottom line the restraints are designed following traditional patents and mechanisms.

Note:

Mild steel/Aluminum and Nickel models absorb fluids.

Stainless Steel can be wiped after use with an alcoholic wipe and stops contamination immediately.

MODEL 1900 LEG CHAINS

Model 1840 Chain Link

SKU: Z-350121

Over-sized leg irons with 14"" high-security heat-treated chain and larger dimension, elliptically contoured satin nickel cuffs. Smith & Wesson Handcuffs are fabricated from the finest quality carbon steel. They are manufactured with heat treated internal lockworks, featuring smooth ratchets for swift cuffing and double locks to prevent tampering.

SSPA – SAFLOK HANDCUFFS

Saf-Lok Model Mk 5 Handcuffs

Easy to Use

Saf-Lok handcuffs are simple to fit and double lock. The smooth ratchet assures that the handcuff can be applied to large or small wrists with minimal effort.

The double locking is by fingertip. This can be done easily and quickly, in any conditions, by all officers.

Because double locking does not require a key, control of the subject is gained without loss of momentum.

In stressful tactical situations, as soon as the cuffs have been applied, the officer is free to concentrate on the rest of the mission.

The user-friendly locking system also enable the officer to reset the cuffs quickly on removal, ready for reuse.

Secure

In test conditions, the complex tumbler lock has prevented attempts, even by expert locksmiths, to open the cuffs.

Even if the handcuff ratchet arm is sawn through, the ratchet will stay in position until unlocked.

Unique keys offer improved pick resistance over lower quality handcuffs.
