Personal Protective Equipment

The market for PPE is currently undergoing major growth and there are many suppliers jostling for business in this sector. This is why serious consideration needs to be given to the standard of equipment offered, and the proof that it is able to cope with the rigours of the job.

Scorpion PPE has been recognised as leading, high quality brand, able to cope with many different situations and incorporating an ease of deployment that greatly increases its effectiveness.

MALE P.P.E.

Available in all sizes, this Level 2 protection has been designed with weight savings to improve performance and manoeuvrability. Comfort is enhanced by the addition of cotton covers on all elasticated straps which also reduces heat transfer.

FEMALE P.P.E.

The Scorpion range of Female PPE incorporates special products and size ranges which have been developed to ensure female officers have access to the same superior levels of comfort and protection as their Scorpion-equipped male colleagues.

Certification

BRITISH STANDARD CERTIFICATION

The Scorpion range of blunt trauma protection has been tested and approved to BS7971-4:2002 Level 2 standard and awarded the EC Type Certificate in accordance with article 10 of the of the PPE Directive (89/686/EEC) and approved by the British Home Office - HOSDB (CAST Standard) Certificate.

Scorpion Range Blunt Trauma Protection

SCORPION PPE

The effectiveness of blunt trauma protection depends upon a combination of factors including strength, durability, comfort and flexibility to be able to cope with the many different situations found in the field.

The Scorpion range has been designed with weight savings, improved performance and manoeuvrability, with a range of sizes to ensure both male and female officers have access to the same high standards of equipment.

No one can foresee the amount of time the officer will be wearing the PPE, or the amount of punishment they will be required to withstand, which is why every component is exhaustively tested in the development stage to cope with almost any eventuality.

Scorpion blunt trauma protection has been independently tested to BS 7971-4 and HOSDB (CAST) CERTIFICATE

**ERGONOMIC DESIGN
FOR MAXIMUM
FREE MOVEMENT**

Scorpion Range of Blunt Trauma Protection

Shoulder Guards/Upper Arm

Designed to work in conjunction with officers' blunt trauma protection, allowing maximum movement and protection.

Conforms to the BS Standard and HOSDB (CAST), offers maximum protection.

Groin Guards for Male/Female

A fully adjustable 2" webbing belt. Ensuring the thigh guards stay in position.

This slimline groin protector in both Male and Female versions are washable and secure in use.

Forearm/Elbow Protector

The protector is available in a wide range of sizes to allow for greater movement and fitted protection.

Thigh Guards

Available in five sizes. these are ergonomically designed to give maximum coverage without impeding movement.

Shin/Knee Protectors

A innovative lightweight design that fits the curvature of the officer's lower leg.

This ensures there are no pressure points on the knee or ankle, with cotton covered straps for maximum comfort.

Available either full-cover or lightweight in 5 sizes.

Foot Protectors

Designed to prevent injuries to the top of the foot, easily attached by a leather strap fed under boot laces.

Scorpion Range of Shields and Batons

Interlock Shield

Ease of Stacking

A key feature of the Scorpion Shield range is it has been designed to address the problems frequently encountered in the storage and transportation of Personal Protective Equipment.

Fixed Handles or Locking Handles

Unlike other shields on the market, there's an option available when specifying the handles on the Scorpion range of shields.

Either a simple fixed handle design or locking handles which fold flat using a unique locking mechanism, so that valuable vehicle space can be utilised more effectively. The user is able to lock and unlock the handles in seconds, providing an effective barrier when confronted with a wide variety of situations.

This saves the user time and effort in situations where effective shielding, combined with speedy action often means the difference between protection or injury.

SCORPION INTERLOCK SHIELDS

A specially designed friction linkage system joins the shields together to form a continuous barrier, whilst still allowing easy, straight forward operation.

SCORPION HIGHGUARD SHIELDS

Visibility

Made transparent from Makrolon® Polycarbonate the shields offer superior protection and greatly improved vision for officers looking through the shields.

Another key feature of our Highguard range is they can be interlocked in an overhead position for protection from an overhead attack situation

Produced from Makrolon® Polycarbonate ensuring superior impact resistance.

Products can be tailored to specific requirements.

Solo Shield

SCORPION SOLO SHIELDS

Impact Protection

Built of tough Makrolon® Polycarbonate shield and the handle, this enables the shield to absorb a greater degree of impact before reaching the handles.

Traditional Batons

BATONS

Traditional Design in a range of sizes Made from 31mm diameter, tough black nylon 6 rod, with a durable rubber grip for added security in use. Each baton has a rubber stop to accurately locate into the belt holder.

All batons come with an integrated 8, plait, 5mm diameter lanyard to securely fix the baton around the users wrist.

The background image shows a person in full riot gear, including a helmet with a clear visor and a large, dark riot shield. The shield has a textured, ribbed surface. In the background, another person in riot gear is visible, holding a baton. The setting appears to be outdoors near a building with a corrugated metal roof.

DMS Protective Equipment Ltd.

The Scorpion range of blunt trauma protection and riot shields have been designed and developed to provide the front line officer with a high degree of protection and improved manoeuvrability.

The extensive range of blunt trauma protection has been independently tested against the requirements of British Standard BS7971.4 and HOSDB (CAST) Certificate.

Our UK factory is equipped with the latest machinery for the production of plastic components, with a motivated workforce dedicated to providing the highest quality and service at all times.
