**PRO TEC Protective Head Gear –****Code: BT01**

NEW! This Helmet is designed to fit a particular individual as its primarily based on obtaining head measurements from the client requiring a full-extreme helmet. It can be designed to suit a range of clients too. *Contact SSPA today for further information!*

Optional: Comes with many possible combinations, Wire face guard, Perspex face guard, padded ears, internal & external, various securing fastening devices depending on client.

Level 4 – High to Extreme Risk

The BT-01 is the standard base helmet. It is designed to keep the patients who wear them comfortable and well-protected.

It covers the temporal/cheek area as well as providing protection around the ear.

Many standard accessories are available for this helmet.

Closure Systems

Used to prevent patient from removing helmet. Can be made with or without turtleneck for extra closure. Available in four different locking styles.

Rigid Plastic Dome

This option is the most durable dome available. It is made from 3mm plastic with a back strap to hold it in place. It is available with internal and/or external padding. Ventilation holes are available and/or a nylon cover to protect padding from patients who like to pick at the padding. (RD)

Additions to Rigid Plastic Dome

Vent Holes- VH
Internal Padding- IP

Nylon Cover- NC
External Padding- XP

External & Internal Padding- XIP

Molded Ear Cups

These are the strongest ear cups made. Made of 3mm plastic with vent holes for better hearing and ventilation. (EC)

Available with external padding and leather covering. (PDEC)

PROTEC

SAFETY & PROTECTIVE EQUIPMENT

ANTI TEAR SMOCK

Code # **Z-ATS001**

Ideal for use in:

Hospitals/Psychiatric Wards
Adult Prisons
Juvenile Facilities
Mental Health Units

PROTEC (sleeveless) smock is a tear-resistant single-piece outer garment that is generally used to prevent a hospitalized, incarcerated, or otherwise detained individual from forming a noose with the garment to commit suicide.

PROTEC garments are made for high risk suicide-prone individuals as the gown is made from extremely tear-resistant material. (Level 5 cat)

Description:

Heavy-duty Denier Cordura /polyester

Industrial lockstitch secures quilted polyester inner batting.

Stitched using heavy-duty nylon upholstery thread with reinforce edges.

Fastening strips of Velcro in an overlap design have been added.

The straps are adjustable to fit multiple body shapes and sizes.

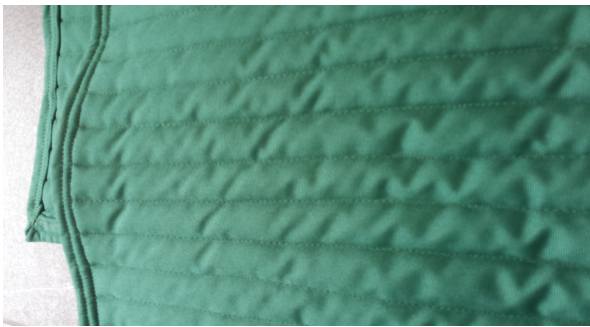

Length: 44-48 inches, as adjusted at shoulders.

One size fits almost all, designed for height ranges between 5'0" to 6'6"

Girth: 55-61 inches at chest (by adjusting at front)

DETAILS OF SUICIDE BLANKETS (Heavy Duty)

- ITEM: ANTI-SUICIDE BLANKETS (MENTAL HEALTH listed article)
- ART # **Z-ATB001A**
- Outer Two Layers: Green 650 Denier Cordura Backed with Urethane (too strong to tear into strips)
- Quilt Filler: 9.0 oz. polyester fiberfill (too bulky to be tied into knots or twisted into rope)
- Stitching: stitched together in one inch rows and heavy-duty nylon upholstery thread secures the edges.
- Size: 54x80 inch.
- Weight: Approx 4.0 lbs

Water Absorbent Towel (141cm x 60cm) **(For hospital and Health patients) Product Code: Z-CT**

Unlike textile based towels, these are far more superior for drying up water and fluids.

The material is soft and non abrasive to the human skin.

With this huge size you can dry quicker, less wringing out is required.

New ultra microfibre technology gives you a super soft and absorbent cloth, without causing skin abrasion or dermis-rubbing.

Machine washable on regular cycle and long lasting.

Size dimensions: 141cm x 60cm.

Color: Yellow

Materials:

The material is 100 percent non-woven viscose so it wipes up like a towel, dries like a towel, and absorbs liquids like a sponge.

This man made towel is created in a special process spun with warm air- making it super-absorbent. It is lint free, strong, and soft. The Z-CT is scratch free on any surface, washable, reusable.

The Z-CT will last for years and fine woven process makes it difficult to tear or unravel.

They are not made from animal skins so they resist absorption of odors and mildew better than a natural materials.

The Z-CT also stays soft after use and requires no special care instructions.

Made in Germany (EU tested)

PROTEC

PROTECTIVE GEAR

SPIT HOOD – Highly Durable

The PRO TEC Spit Hood has been designed to offer protection to carers, aids and law enforcement personnel against infectious diseases, fluids and air borne pathogens delivered by non compliant subject, while being transported.

PRO TEC SPIT HOOD

The PROTEC Spit Hood was designed to fit over a person's head securely, while having the capacity to fit over a person wearing a protective (self-harmer) helmet too. With the increase in non-compliant person's potentially using 'spitting' as a deterrent or as an act of aggression, standard products available in the market place are just not offering as much protection. PROTEC Spit Hood was created to prohibit the transfer of saliva and other infectious diseases.

The **Spit Hood** prohibits spitting, and assists carers of subjects being transported from such high risks. It also helps keep vehicles/patrol cars clean.

Catches and retains blood, vomit and other bodily fluids.

One size fits all.

Allows you to observe your suspect's face

Individually packaged safe, secure fit.

Disposable lightweight material Elastic neck allows for fast and easy removal.

Helps curb aggressive behavior

Key Features

Simple to place over subject's head

- Lightweight, High tensile mesh and elasticised base
- Fits around neck loosely
- Cotton lower section (stops fluids)
- Clear air passage
- Difficult for subject to remove
- Disposable
- Compact -- can fit into a pocket
- Improves cleanliness
- Protects from unnecessary threats/risk

Product code :

C - 8076

Closure Systems

Reinforced nylon-elastic strap guarantees a firmer fit around the neck and upper shoulder area..

SPIT HOOD – Fits over any additional Protective helmet which is worn

**One size
fits all**
